Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102 & 35 USC § 103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 18 and 32-37 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kung et al (6,508,756 B1).

Kung et al discloses a passive heart restraint device and further disclose accessing the heart; selecting a device sized to be placed on the heart, including selecting a device of electrical permeability sufficient to apply trans-chest defibrillation of the heart; placing the device on the heart, the device comprising a biocompatible material configured to engage the surface of the heart to constrain circumferential expansion of the heart; passing an electrical current to and from the heart; securing the device on the heart; adjusting the device to snugly conform to the external geometry of the heart; the material is a substantially non-elastic material; the passing of an electrical current to and

Art Unit: 3736

from the heart is accomplished using electrical elements; and the electrical elements are pacer leads. See Column 12, lines 11-21; and Column 19, lines 15-65.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to utilize sutures to secure the device to the heart because the Applicant has not disclosed that the use of sutures provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected the drawstrings of Kung et al and the Applicants' invention, to perform equally well with either the drawstrings as taught by Kung et al or that of the claimed sutures, because means secure the device to the heart.

Response to Arguments

4. Applicant's arguments with respect to claims 18 and 32-35 have been considered but are moot in view of the new ground(s) of rejection.
